

# Futures HealthCore Therapy Centers

## Discover A Better Way Forward

*At Futures HealthCore we believe children with special healthcare needs should be seen through the right lens and offered the right tools, guidance and services that improve their lives.*

For children of all ages who face physical, cognitive, behavioral or learning challenges, we provide unique therapy services to help them thrive and succeed.

Our clinicians are experts – confident innovators and forward-thinkers who bring the most effective therapy services to your child with an unwavering focus on positive outcomes, no matter what the challenge.

*After all – their success is our success.*

## Discover Our Services

Covered by most insurance plans, Futures HealthCore provides a wide array of pediatric therapy services, including sensory integration, feeding programs and autism services, in a collaborative effort with physicians, community health agencies, parents and families.

Our services can be scheduled around your schedule. We're open from 8 a.m. until 7 p.m. Monday through Friday, and from 9 a.m. until 2 p.m. on Saturdays, providing services that include:

- *Occupational Therapy*
- *Speech and Language Therapy*
- *Physical Therapy*
- *Psychological Services*

For many of our patients we can provide back-to-back appointments for different therapy services – making it more convenient for parents and families to schedule one visit, rather than multiple trips to different locations.

## Discover A Better Approach

At Futures HealthCore Therapy Centers, we blend a variety of treatment techniques into play-based sessions to provide children the best opportunity for developmental, social and emotional development.

Play – which we believe is the most fun and motivating way to learn – is the focus of our treatment approach that builds on your child’s strengths, while also addressing their specific development needs.

Futures HealthCore clinicians work with you, your physician and your child to develop an individual treatment plan. Treatment plans tailored to the unique needs of your child may include social skills, cognition, gross and fine motor development, sensory processing and language development.

Futures HealthCore Therapy Centers provide a wide range of pediatric patients with cognitive, behavioral or learning challenges, including children diagnosed with:

- Autism Spectrum Disorders
- Cerebral Palsy
- Developmental Delays
- ADD/ADHD
- Brain Injury
- Down Syndrome
- Sensory Integration Dysfunction

“Before my daughter started working with (an occupational therapist from Futures), we could not find an OT willing or able to deal with her complicated case. My daughter has made gains working with the Futures OT – an expert in Sensory Integration Disorder who uses a comprehensive and creative approach in each session. I know that she has made a huge difference in my daughter’s life.”

– Barbara D.,  
Futures HealthCore Therapy Center Parent

## Discover Futures

Founded in 1998 by renowned clinicians and educators, Futures HealthCore provides clinical expertise unparalleled in depth and breadth. All members of our leadership team are clinicians, administrators and educators, with a comprehensive understanding of the issues and challenges related to special healthcare needs.
